ANNUAL REPORT
OF THE
FIRE WARDS,
TREASURER
— AND —
AUDITOR
— OF —
Littleton Fire District,
FOR THE
Fiscal Year Ending March 1st, '91.

LITTLETON, N. H.:
Courier Publishing Company, Printers,
1891.

PRINTING REPORTS.

It was voted that the Fire Wards be directed to cause their Report and Recommendations and the Reports of the Treasurer and Auditor for the past year to be printed in pamphlet form at the expense of the District; and that hereafter they be directed annually to prepare and have such report printed in like manner and distributed before the Annual Meeting.

VOTE OF THE DISTRICT, APRIL 14, 1891.

LITTLETON FIRE DISTRICT.

OFFICERS 1890-91.

TO THE INHABITANTS OF THE LITTLETON FIRE DISTRICT:

The Fire Wards, in this their first printed report to the district, deem it advisable to give a brief summary of the steps heretofore taken in this community for the protection of property against fire, and which have brought us to the stage we have now reached.

The present satisfactory condition of the Fire Department is the result of a gradual developement and a constant progress in improvement. Many years ago the growth of the village brought the attention of the people to the necessity of special efforts in the prevention of fires. The structures for residence and business were generally of wood, and were coming to be in dangerous proximity to each other at many points. The more compact part of the village suffered frequently from destructive fires. There was plenty of water, but how to secure its effective distribution in cases of emergency was still a problem. The bucket line was of some use when the fire had not gained much headway, but it often happened that the Fire Fiend was treacherous in his dealings with our good people, attacking their property in the night, in the winter, in time of high wind, and under other unfavorable conditions, and giving no notice of his coming. A crank hand engine was the first machine obtained. It served the purpose imperfectly and after a while was abandoned. Then a more formidable machine, which was worked with hand brakes or sweeps was procured. A company was organized to work it. This was composed of lusty and energetic young men who had regulation firemen's uniforms, with rubber hats, red shirts, etc. Cisterns, like the one recently opened at the corner of Main and Jackson streets, and like the one in front of B. W. Kilburn's residence, supplied the machines with water. Frank Smith, now of West Littleton, and James R. Jackson were Foremen and Clerk of this organization.

This occurred before the War of the Rebellion. Meantime the Littleton Woolen Mills, which occupied the site of the present Sarnac Mills, the Kilburn Foundry and the Eastman Grist-mill added force pumps to their plants, primarily for their own individual protection; but hose was procured and this machinery thus became available, to a limited extent, for the public protection. The Village Fire Precinct was organized to give these efforts a certain and permanent public support and to direct them in a systematic way.

This was accomplished in 1873, in this way:

AN ACT to establish a Fire District in Littleton was passed by the Legislature and approved July 3, 1872.

(Laws of 1872, Ch. 147.)

Under this authority the Selectmen fixed the limits of a Fire District on the North side of the river, and by Warrant dated Jan. 29, '73, called a meeting to act upon the establishment of a fire district, to effect an organization and transact the usual business, to be holden February 13, 1873. (Town Records, Vol. 8, p. 583.) The district thus established has been enlarged from time to time, the principal extension being made on the South side of the river where the Water Company agreed to extend their mains across the Ammonoosuc.

The book of Records, now in use by the District Clerk, was commenced in 1883. No previous record of the Fire Precinct or District in this village has been placed in his custody. If such record is in existence it should be returned to the Clerk. The Book of Assessments for the town indicates that an assessment was first laid for a Fire Precinct in 1873. (See article in *White Mountain Republic*, April 19, 1873.)

The method of pumping into hose attached to pumps near the river was abandoned so far as the precinct was concerned, because the area benefited was too limited, and then pipes or mains were laid from the river to Main street and from thence made available by hydrants and additional hose over still more of the compact part of the village. For several years this system was the main reliance for the prevention and extinguishment of fires. At length the public realized that in this system we were behind the times, and that the village with its constant growth and persistent adherence to wooden structures was not protected as it might be by improved methods. This sentiment encouraged some of our citizens to undertake the construction of water works on an elaborate scale for the domestic uses as well as for the needs of the District. This great advance was accomplished in 1878 by the incorporation and establishment of the Apthorp Reservoir Company. This corporation constructed three reservoirs at different altitudes on the hills to the Northward of the village and laid an elaborate system of water mains. The largest and lower Reservoir which they built, situated near Oak Hill, has a capacity of 500,000 gallons and is more than 200 feet

higher than Main street. This system however, was found to be imperfect in one particular. In seasons of extreme drouth it failed to yield an ample supply, for domestic purposes and at the same time hold back a sufficient body of water in the reservoirs for the fire department. Neither could that plant be extended to the South side of the river for the reason above stated. Notwithstanding its defects, the system was a valuable one for the public and was the foundation of what has since developed into one of the best water plants in the State. In 1887, the Apthorp Reservoir Company and the Ammonoosuc Electric Light Company each sold their property and franchises to parties in New York, who procured the incorporation of the Littleton Water and Electric Light Company. This corporation purchased the Cate mill property at Apthorp in addition to the real estate of the former Company, and put in pumps with which to re-enforce the previous supply by taking water from the river above the village, and in fact above any point where drainage is turned into the stream. They also extended the water system to the South side and constructed a plant at Apthorp which now furnishes Electric Lights for all purposes, public and private.

The President of the Company is Benj. H. Corning, who has superintended the construction of all the Company's works since its formation in 1887.

This water supply is distributed through five and one-half miles of subteranean iron pipe and the electric light plant operates upon eleven miles of wire.

From this system the Precinct now has by lease for a term of years forty Hydrants and four sprinkling Stand Pipes, and the Town has one hundred and nine Electric Lights for the illumination of the highways and two public water troughs. The coming year, a system of electric fire alarm should be added to the provisions made for the prevention of fires by the District.

The Fire department has a hose house and firemen's quarters in the Granite building on Main Street, which is as well located as any single station that could be selected. The mechanical equipment of the department now includes one large four-wheeled hose carriage, carrying between four hundred and five hundred feet of hose; two small two-wheeled hose carriages; carrying between three hundred and four hundred feet of hose, (one of these is located at the apartment leased by the District at the Alex McIntire

place on Cottage Street); one hook and ladder carriage, carrying six ladders; twelve ladders in good condition is the total belonging to the District; a full supply of firemen's hooks, pick axes, shovels, pails, etc.; twenty-five sets rubber Coats and hats; eighteen hundred feet of leather hose; three hundred and fifty feet of cotton hose on the south side at the McIntire station; four sets of hydrant branches, each branch with two apertures, thus making four outlets from each hydrant; fifty feet of deluge hose, four-inch, throwing a two-inch stream.

We have a well disciplined, intelligent and experienced corps of young men who constitute the hose company and who are thoroughly familiar with the management of the water works and apparatus in case of emergency.

This department has been liberally supported by the people and to that encouragement is due its present satisfactory condition.

No fires have occurred within the district limits the past year. Precautionary measures wisely and persistently adhered to by those in control of exposed property will greatly aid the department in keeping this good record unbroken.

On the first of June, 1890, a serious conflagration occurred at Lisbon, in which the Parker & Young Manufacturing Company's works were destroyed and many other properties in the same vicinity were consumed.

At the call of the authorities at Lisbon, our Firemen promptly responded, taking with them hose and other apparatus. Their assistance was timely and efficient in checking the spread of the fire. The men were under the personal direction of Foreman Elbridge Young.

Many expressions of appreciation of this service were received from Lisbon. The following vote of the Quarterly Conference of the M. E. Church reflected the general sentiment. At a meeting on June 17, they say:

"The members of the Fire Department present did much to stay the fire in its progress, thereby saving said house, [their parsonage,] from burning; *Therefore*, resolved that the members of the Official Board of the M. E. Church in Lisbon, by this vote hereby recognize their faithfulness and also tender them our sincere thanks."

While we have not neglected the necessary provisions for

dealing with fires as they may actually occur, we shall continue to lay great stress upon the importance of taking all reasonable and practicable precautionary measures to forestall the occasion for the use of our apparatus for the extinguishment of fires. We desire also most emphatically to urge the supreme importance of having chimneys properly constructed, stove pipes carefully connected and wood work protected in every building where fires are kept; of safe and suitable receptacles for ashes; and of taking care of shavings, oils and all combustibles. No system of insurance, no fire department can be substituted for these simple precautions.

A. J. CRAM, W. M. SILSBY, JOHN A. FOGG, C. R. COBURN, H. A. EATON,	}	Fire Wards.
--	---	----------------

FIRE REGULATIONS.

The Firewardens of the Littleton Fire District have established the following regulations for the better protection of property in this District, in compliance with Sec. 9, Chap. 94, of the General Statutes:

All persons having the care or charge of ashes are strictly forbidden to keep or store any ashes nearer than 100 feet to any building unless they are kept in an iron, brick or metallic receptacle.

The above regulation shall be in force from and after the First day of February, 1876. Any person guilty of a violation of the above regulation shall be liable to a penalty of twenty dollars for each offence.

E. D. DUNN, CHARLES NURSE, J. L. WHITTAKER, CURTIS GATES, C. H. GREENE.	}	Firewards of Littleton Fire District.

LAWS RELATING TO REPORTS OF FIRE WARDS AND THE DUTIES OF TOWN CLERKS.

Laws of 1889, Ch. 17.

SEC. 1. It shall be the duty of town * * Clerks to report within thirty days after the annual town meeting in towns, to the Insurance Commissioner the names * * * of the firewards in towns and fire precincts, * * * If within said thirty days the local officers herein named shall not have been chosen in any town * * the clerk thereof shall report the facts to the state officers mentioned for the appropriate department; and he shall also report such local election or appointment as soon thereafter as it shall be made.

SEC. 2. It shall be the duty of the Clerk of every Fire Precinct and School District forthwith to report to the town clerk, the names and post office address of every person chosen to be a member of the board of fire wards or of the school board, as the case may be.

Laws of 1891, Ch. 7.

SEC. 12. Selectmen of towns, health officers, officers of fire departments, agents and committees in each town and city, and all other municipal officers making printed reports, shall forthwith, after publication, file with the town or city clerk, for the purposes named in section ten of this act, at least four copies of each printed report issued by them.
